**A Petition Under 37 CFR 1.182 or 37 CFR 1.183 For Correction of Filing Date
and Issuance of a Corrected Filing Receipt**

Assistant Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

The filing receipt for this case indicates that this application was granted a filing date of August 3, 1999. This is an error. The filing date for this case is actually August 5, 1999.

The "Application Papers" for this application were deposited in the U.S. mail as Express Mail and sent to the U.S. Patent and Trademark Office on **August 5, 1999** via an envelope labeled "Express Mail Post Office to Addressee" mailing label No. EM164710442US. The U.S. Post Office handwritten entry for the "date in" on the "Express Mail" mailing label is difficult to read. The undersigned attorney believes that the handwritten date could be read as August 5, 1999, but the U.S. Patent and Trademark Office apparently read this handwritten date as August 3, 1999. Because the handwriting is not clear, the "date in" was either incorrectly entered, or there is a discrepancy between the filing date according this application and the "date in".

Certificate of Mailing

Pursuant to 37 CFR 1.8 I certify that this correspondence is being deposited on the date indicated below with the United States Postal Service as First Class Mail addressed to the Assistant Commissioner for Patents, Washington, D.C. 20231

Date:

August 28, 2000

Signature

[Handwritten Signature]

09/11/2000 CNEUYEN 00000066 133723 09369410

01 FC:122 130.00 CH

In another part of the Express Mail mailing label, the document includes different handwriting that states: "Mailed: 8/5/99". A copy of the Express Mail label is enclosed for convenience.

In addition to the specification, claims and drawings, the Application Papers included:

1. A declaration signed by all three of the named inventors on August 5, 1999.
2. An assignment signed by all three of the named inventors on August 5, 1999 and notarized by a notary public on the same date.
3. An assignment recordation cover sheet signed by the undersigned attorney on August 5, 1999.
4. A Post Card dated August 5, 1999 with Express Mail mailing label no. EM164710442US identified thereon. The postcard identifies the Application Papers.
5. A Transmittal of Application Cover Letter dated August 5, 1999 with Express Mail mailing label no. EM164710442US identified at least twice thereon. This document also identifies the Application Papers.

Clearly, these papers could not have been executed on August 5, 1999 if this case had actually been mailed two days earlier on August 3, 1999. This is clearly an error on the part of the U.S. Post Office. The record should not be obfuscated due to bad handwriting.

Submitted herewith, please find a copy of the Application Transmittal Letter showing the executed Express Mail certificate and the mailing label number EM164710442US along with a Certificate of Express Mailing (37 C.F.R. 1.10(c)) further showing that this case was actually mailed on August 5, 1999. The Application Transmittal Letter was signed by the undersigned attorney, who is registered to practice before the U.S. Patent and Trademark Office (Reg. No. 34,109). The Certificate of Express Mailing was signed by Cheryl Schmitz. Ms. Schmitz worked as my secretary at that time.

Also enclosed is a copy of the declaration, assignment and assignment recordation cover sheet that accompanied the Application Transmittal Letter. These all show the signatures of the different individuals on August 5, 1999. Finally, please

also find enclosed a copy of the postcard for this case that is dated August 5, 1999 and that includes mailing label number EM164710442US thereon. The postcard identifies the Application Papers as identified above.

As shown in the attached copy of Applicant's filing receipt, this application was erroneously assigned a filing date of August 3, 1999. Under either of the "Express Mail" filing procedures proscribed in 37 C.F.R. Section 1.10 (c) or (d), Applicants respectfully submit that this application is clearly entitled to a filing date of August 5, 1999. In the alternative, if for any reason the patent office does not believe that this petition is sufficient under 37 CFR Section 1.10, applicants petition for a filing date of August 5, 1999 and a corrected filing receipt reflecting the change pursuant to either 37 CFR 1.182 or 37 CFR 1.183. The evidence presented in this petition shows that it would be manifestly erroneous to maintain the filing date of August 3, 1999 for this case. Nothing further should be required from the applicants.

In view of the above, Applicants respectfully request correction of the filing date of this application to August 5, 1999, and request that a corrected filing receipt be issued which reflects the corrected filing date.

It is believed that this resulted from a Post Office error (bad handwriting) and that no fee should be due for the correction of the filing date and the issuance of a corrected filing receipt. If the Patent and Trademark Office disagrees, Applicants authorize payment of the necessary fee of \$130.00 for a petition under 37 CFR 1.182 or 37 CFR 1.183 or for a filing date as required under 37 C.F.R. 1.17(h) or (i) from deposit account No. 13-3723.

Respectfully submitted,

§1.56 Duty to disclose information material to patentability.

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and
- (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

- (1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or
- (2) It refutes, or is inconsistent with, a position the applicant takes in:
 - (i) Opposing an argument of unpatentability relied on by the Office, or
 - (ii) Asserting an argument of patentability.

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

- (1) Each inventor named in the application;
- (2) Each attorney or agent who prepares or prosecutes the application; and
- (3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.

and have contemporaneously executed an application for Letters Patent of the United States of America based thereon;

Now, therefore, for good and valuable consideration, receipt of which is acknowledged, we have individually and jointly agreed to assign and transfer and do hereby assign and transfer unto the 3M INNOVATIVE PROPERTIES COMPANY, a wholly owned subsidiary of MINNESOTA MINING AND MANUFACTURING COMPANY, and a corporation of Delaware, having its principal office at Saint Paul, Minnesota, its successors and assigns, the entire right, title, and interest in and to the said invention and application, and in and to any division or continuation (in whole or in part) of said application, and in and to any and all improvements in the said invention made by us or any of us or made jointly with others (provided any such improvement is made during, or within one year after the termination of, the employment by Minnesota Mining and Manufacturing Company and any of its existing or future subsidiaries of whichever of us, solely or jointly with one or more others, has made the same), and in and to any and all Letters Patent, reexaminations, reissues, or extensions thereof, of the United States of America and countries foreign thereto (including the right to apply for Letters Patent, Utility Models, or Inventors' Certificates in foreign countries in its own name and to claim any priority rights for such foreign applications to which such applications are entitled under international conventions, treaties, or otherwise), which have been or may be granted thereon or on any divisional, continuation (in whole or in part), renewal, reexamination, reissue, or other or further application based in whole or in part upon the said invention or improvements thereon, to be held and enjoyed as fully and exclusively as they would have been by us or any of us had this assignment and transfer not been made,

We do further agree for ourselves and for our heirs, executors, and administrators, to execute and deliver without further consideration any further applications, assignments, and documents, and to perform such other acts as we lawfully may, that may be deemed necessary by the said Company, its successors, assigns, and nominees, fully to secure its right, title, and interest as aforesaid and to obtain or maintain Letters Patent, Utility Models, or Inventors' Certificates in any and all countries;

And we do hereby authorize and request the Commissioner of Patents to issue any and all Letters Patent which may be granted upon any of the said applications, to the said 3M Innovative Properties Company, as the assignee of the entire right, title, and interest therein.
